

Cord decontamination just got easier – and more effective.

# Introducing **The Cord Caddy™** with New ICAP

*A total system that disinfects, organizes and stores cords.*

## **ICAP is an innovative addition to The Cord Caddy that couldn't be more timely:**

- Changes in Medicare/Medicaid reimbursement will cause more scrutiny
- Hospitals are taking more stringent measures to prevent hospital born infections
- Since cords are re-used from patient to patient, you need a quick way to disinfect them on the spot – and get them ready for the next patient

## **Now, in moments, you can clean, wrap and store cords.**

The Cord Caddy, along with the new ICAP dispenser and disinfecting wipes is a complete system – that not only organizes and stores your cords, it makes disinfection easy and lead application more efficient. And that means peace of mind for you and your staff.

## **The Cord Caddy**

The cord organizer for hospital monitors that improves nursing efficiency:

- Faster application of leads speeds up patient assessment and treatment
- Elimination of tangled cords reduces time loss and hassle
- Cords off the floor improves infection control
- Minimized cord breakage and loss saves costs
- Equipment moves more easily around bedside
- Potential for tripping accidents is reduced
- Room appearance is dramatically improved

ICAP: Infection Control  
and Prevention

# Introducing The Cord Caddy™ with New ICAP

**The ideal way to reduce the risk of transmitting infection from patient to patient due to contaminated cords:**

- Secures conveniently on the back of The Cord Caddy unit
- Located right where it's needed to encourage better hygiene habits/protocol
