

**Reduce Tripping Hazards and
Improve Infection Prevention**

Introducing **Nurse Call Cord Caddy!**

Your hospital invests significant time, effort and money to improve room hygiene and infection prevention. Until now there has not been a product that hangs the pillow speaker, while keeping the cord neatly wrapped and off the floor. **Nurse Call Cord Caddy** is the answer.

Nurse Call Cord Caddy mounts to the wall or headwall. Now after the pillow speaker and cord are cleaned, they can be neatly hung together, ready for the next patient. With the Caddy in place, cords are deliberately cleaned, wrapped, and stored, encouraging best practices and providing evidence that this protocol has been followed.

Before

After

Healthcare associated infections are a costly problem and hospitals are constantly looking for ways to prevent them. Pillow speakers and cords are exposed to sick patients and then touched by visitors and staff, thus contributing to the spread of germs. **Nurse Call Cord Caddy** is a tool which facilitates best practices, helping to eliminate this potential for germ spreading.

Nurse Call Cord Caddy is from Evolution Medical Products, the people that brought you Cord Caddy—the monitor cord management system that pays for itself by reducing cord replacement costs.
