

Here Is What Cord Caddy Customers Are Saying...

“Prior to having Cord Caddies, cords were forever left dangling and tangled, which was frustrating and took valuable time away from attending to patients.”

Central DuPage Hospital – Winfield, IL

“Cord Caddy has brought organization to our madness, while solving infection control issues and decreasing the number of lost and broken cords.”

Pitt County Memorial Hospital – Greenville, NC

“Cord Caddy has really made a difference in managing our monitor cords. It keeps the rooms clutter-free and looking professional.”

Children’s Memorial Hospital – Chicago, IL

“Cord Caddy eliminates the tangled spaghetti mess, and creates a safer, less hazardous environment to work in, with the hoses, cables and cords wrapped neatly at the bedside and off the floor.”

University of Illinois, Chicago – Chicago, IL

“Cord Caddies have contributed to our ability to deliver care in a much more efficient and safe manner.”

IU Hospital, Clarian Health – Indianapolis, IN

“Cord Caddy is wonderful for saving nursing time.”

Ingalls Hospital – Harvey, IL

“We have realized several benefits as a result of using Cord Caddy. Applying leads is faster and far less frustrating for our nurses, which saves time, reduces stress and improves performance. Also, we now have a protocol for storing and retrieving the cords that certainly helps to keep them off the floor. This in turn has a positive impact on infection control, safety and breakage. We have already noticed a reduction in our expenditures for lost and broken cords, which is in effect paying for the Cord Caddies.

From simply an aesthetic standpoint, Cord Caddy changes the entire appearance of our patient rooms. Instead of chaos we have an organized cord management system. It is about time someone created a device designed specifically to address the nuisance issues brought about by cord clutter.”

Northwestern Memorial Hospital – Chicago, IL

“We have saved an astonishing amount of money since installing Cord Caddies in our ED. The money spent on Cord Caddy was well worth it in terms of finances, but even more in the fact that the staff does not have to stop the care of the patient to search for a new cable when the one in the room is broken. Thank you for your product!”
